

Day 5: DOM Manipulation & Events

Quick Quiz

1. What does `document.querySelector()` do?
2. What's the difference between `innerText` and `innerHTML`?
3. How do you handle a click event in JS?
4. How do you change the background color of a div?
5. How do you add an element to the DOM?

Assignment

1. Create a button that changes the background color of the page when clicked.
2. Build a simple to-do app with input, add button, and a list.

Bonus Challenge

Create a color palette: clicking a color box changes the page background to that color.
