

Day 3: Functions & Scope

Quick Quiz

1. What is a function?
2. What's the difference between a function declaration and function expression?
3. What does return do?
4. What is scope?
5. Can you access a variable declared inside a function from outside?

Assignment

1. Write a function to check if a number is prime.
2. Write a function greet(name) that prints "Hello, [name]!"

Bonus Challenge

Write a function to calculate the factorial of a number.
