Day 6: ES6+ Features & Debugging

Quick Quiz

1. What is destructuring in JS?

2. What's the difference between ...rest and ...spread?

3. What does const mean?

4. What is a template literal?

5. What does try...catch handle?

Assignment

1. Refactor an old function to use arrow syntax.

2. Use a try...catch to handle a JSON parsing error.

Bonus Challenge

Create a simple object, destructure it, and log the values using template literals.
