Day 7: Project Day — Quiz App

Quick Quiz

1. What is an event listener?

2. How do you dynamically create DOM elements?

3. How do you store scores and move to the next question?

4. What does .disabled do to a button?

5. How do you loop through an array of objects?

Assignment

1. Build a working quiz app:

   - Show one question at a time

   - Track correct answers

   - Show score at the end

Bonus Challenge

1. Add a timer for each question.

2. Add a "Restart Quiz" button at the end.
