# Day 4: Arrays & Objects

## Quick Quiz

1. How do you add an item to an array?

2. What does array.length give you?

3. How do you loop through an array?

4. What's the syntax to access object properties?

5. Difference between arrays and objects?

## Assignment

1. Create an array of student names. Add one, remove one, and print the final array.

2. Create an object with a student's name, age, and marks. Log them.

## Bonus Challenge

Create an array of objects of students, and log the names of students who scored more than 80.
